## ANTIOCH BOARD SUBMITS STREET PLANS TOMORROW

After Long Delay Engineer Promises to Rush Improvement

Early completion of five improvement projects on Antioch streets was seen today when Village Clerk R. L. Murrie was advised through the Elgin office of the state highway department that revised plans are to be submitted to the village board of trustees in a special meeting Friday night.

The projects involved include the grading of West North avenue, which the village wants accepted as an arterial highway, and eventually given a blacktop, or bituminous surface; East North avenue, new surface; Orchard street and Hillside avenue, new finish; Spafford street, bituminous surface; and widening and grading of Harden street for sealcoated surface to be applied later.

**Name Three Arterials**  
East North avenue has been designated as arterial No. 1; Spafford as No. 2; Hillside ave., No. 3. The highway department was informed some months ago that East North avenue, Orchard street and Hillside avenue had been graded and were ready for the bituminous finish, but the work was delayed; notwithstanding the funds were available from state gas tax refunds.

Due to the fact that surfacing the streets with the bituminous material can be done better in warm weather, board members at this time advise that this part of the work be delayed until next summer. Meanwhile, they have included further projects in order to make the present work acceptable to contractors and plans for the preliminary grading and widening are being prepared by the engineer.

According to plans of Engineer E. W. Parlasca the plans are to be submitted for the district office's approval Monday, which will enable the local village board to advertise for bids and award the contract by the 25th of this month.

## Old Fraternity Gang Holds Reunion at Lake Catherine

Zeta Mu Epsilon Fraternity, a local organization chartered in 1913, held a reunion at the "Cracker Box," Kreicker's summer home on the west shores of Lake Catherine over the last weekend.

Eleven members and two guests attended what started out to be a reunion, but wound up as an African golf game with one of the members securing enough of the long green stuff to pay off the mortgage on the old homestead.

Of eleven members attending all were past Presidents of the organization which disbanded in 1931 after eighteen years of meeting. The gathering over the weekend was an attempt to reorganize the group.

In attendance were Bob Robertson, Hobie Sommers, Carl Oremba, Harry Ekman, John Kaderli, Herb Dent, Curly Larsen, Lynn Broadbush, Max Emanuel, Aaron Stiles and Lon Kreicker; together with two guests, Jim Capps and Bill Schofield.

Local fishermen need have no fears regarding the depletion of the Chain O' Lakes waters, for despite the fact that one or more members whipped both Channel and Catherine Lakes to a fine froth, their efforts were rewarded with nothing more than the proverbial fisherman's luck.

## ANTIOCH FIREMEN HAVE FISH FRY

Members of the Antioch Fire Department enjoyed a fish fry at the fire station Monday night. Fish for the occasion were sent to the firemen by Dr. D. N. Deering and Naslon Sibley who last week were fishing in the vicinity of International Falls near the Canadian border. Bill Anderson, formerly active in the department during his residence here, came from Deeringfield to attend.

**TO HOLD CHEST CLINIC**  
The next chest clinic will be held Wednesday, October 13th at St. Theresa Hospital in Waukegan. Examination at the clinic is free and anyone who needs such an examination and is without the funds to pay a private physician is urged to attend.

These clinics are sponsored by the Lake County Tuberculosis Association which is supported by the sale of Christmas seals.

## Launch Drive For New PTA Members

Group to Hold Second Meeting at Grade School Monday Night

The Antioch Grade School Parent-Teacher association next week will launch a drive for new members among the fathers and mothers of school children, officials of the group announced this week. Named chairman of the membership committee is Mrs. Ida Kulak, who will be assisted by the entire personnel of the association in inducing new members to join and take a part in the activities of the PTA.

The second meeting of the year of the association will be held Monday night at 8 o'clock in the grade school building when there will be a program given by the boys of the 7th grade and report given of the Lake County Council meeting held at the Gavin school October 4.

An effort is being made to secure Mrs. Holland Flager, past state president of the Illinois Congress of Parents and Teachers, for the speaker for Monday night. Dr. L. John Zimmerman is chairman of the program committee.

## ANTIOCH TO HAVE WILD FOWL REFUGE ON HIGH SCHOOL LAND

### Game Preserve of 10 Acres in Project Sponsored by Future Farmers

Property now owned by the Antioch Township High School District, east of the Soo Line Railway, and comprising ten acres of partially wooded land and a small lake, will be come a refuge for wild water fowl and upland game birds.

The project is being sponsored by the Future Farmers of America, an organization of boys enrolled in the vocational agriculture classes of the Antioch High School. This organization will in turn work with an Advisory Council consisting of three High School faculty members: Principal L. O. Bright, R. Childers and C. L. Kuit.

During the past few years, numerous pheasants and partridge have made this tract their home and feed has been provided there for them. At present an effort is being made to attract water fowl and during the past week several small flocks of wild ducks have stopped.

At present the Future Farmer boys are getting ready to post several signs in and around the premises prohibiting hunting. Feed is being placed around the edge of the lake.

The public is urged to cooperate with the Future Farmers in maintaining this refuge and sportsmen are asked to enforce the no-hunting regulation on this tract at all times.

Public spirited persons, wishing to aid in this good work are asked to communicate with C. L. Kuit.

Feed, such as shelled or ear corn, oats, buckwheat is needed at present to attract the birds. Later some emergency feeding may have to be done to aid the upland fowl through severe snow and sleet storms. Some shelters and feeders may have to be constructed and any suitable materials, will be accepted from local people who may be interested and wish to aid the project.

## FORMER G-MAN TO BE SPEAKER AT LIONS CLUB DINNER MONDAY

### Henry Krueger, Man Who Trained Dillinger, Will Tell Experiences

First hand information regarding the training and experiences of G-men will be brought to the Antioch Lions at the dinner meeting of the club at Antioch hotel Monday evening at 7:00 o'clock by Henry Krueger, assistant treasurer of the Lions International and formerly with the U. S. department of justice, working under Edgar Hoover, chief of the G-men. Krueger will recount his experiences while on the trail of John Dillinger, "Baby-face" Nelson, the Bremer kidnappers, and other notorious cases. Krueger was on the firing line in many international, known criminal cases and speaks from actual experience. He will also tell of the requirements and training of federal agents.

## DRIVE FOR MOTOR SIGNALING TO BE STARTED NOV. 15

### Highway Department Plans Statewide Program as Safety Measure

Notice that sections of the Illinois motor vehicle act relating to directional signal lights is to be rigidly enforced on and after November 15 is being given by the state highway department.

Letters signed by Ernst Lieberman, chief highway engineer, are being sent throughout the state this week, with the explanation that the warning is being given at this time so that owners of cars will have ample time to have them equipped with the necessary signals before November 15.

An effort is being made to secure Mrs. Holland Flager, past state president of the Illinois Congress of Parents and Teachers, for the speaker for Monday night. Dr. L. John Zimmerman is chairman of the program committee.

(a) No person shall turn a vehicle from a direct course upon a highway unless and until such movement can be made with reasonable safety and then only after giving a clearly audible signal by sounding the horn if any pedestrian may be affected by such movement or after giving an appropriate signal in the manner hereinafter provided in the event any other vehicle may be affected by such movement.

(b) A signal of intention to turn right or left shall be given during not less than the last 100 feet traveled by the vehicle before turning.

(c) No person shall stop or suddenly decrease the speed of a vehicle without first giving an appropriate signal in the manner provided herein to the driver of any vehicle immediately to the rear when there is opportunity to give such signal.

66. Signal by Hand and Arm or Signal Device.—The signals herein required shall be given either by means of the hand and arm or by a signal lamp or signal device, but when a vehicle (continued on page 8)

## G. O. P. SET TO NAME PIERCE; DEMOCRATS PIN HOPES ON GEORGE LYON

With Lake county having officially clinched on "Bill" Pierce's judicial hand wagon everything seems set to vote the Belvidere lawyer into the Republican nomination for circuit court judge when the district convention meets in Woodstock this Saturday.

Looming as the standard bearer for the Democrats is George R. Lyon, Waukegan attorney who is to receive the Lake county vote when the Democrats convene to name a candidate on October 15. Winnebago, Boone and McHenry counties will send unstructured delegates. Thus the Lake county entrant will go into the convention with 44 votes. There will be 115 delegates.

The election date is Dec. 7.

## Novena Service Starts at St. Peter's Monday

### Father Arthur Klyber Will Lead 9-Day Devotions at Local Church

A Solemn Novena in honor of Our Lady of Perpetual Help will be held in St. Peter's Church, Antioch, beginning Monday, October 11. A Novena is so called because it consists of nine days of public or private devotions to obtain special graces. It is in imitation of the Apostles who were gathered together in prayer for nine days between Ascension Thursday and Pentecost.

The services will consist of the reading of requests and also thanksgivings for requests received—Hymns and prayers by the entire congregation—Serenity—Blessing of the sick—Benediction of the Most Blessed Sacrament and finally the blessing of each individual by the priest.

Father Arthur Klyber, the missionary who is to preach the sermons and conduct the services is well known as a Redemptorist orator. He was born in that famous district of New York known as Delancey St. At the age of seventeen he joined the United States Navy on the very day the United States declared war against the Central powers in the World War. As a member of the navy he had varied experiences in foreign and home territory. He studied for the priesthood in Missouri.

Mr. and Mrs. E. F. Vos attended the charter night meeting of the Kenosha Lions club held at the Elks club last night. Mr. Vos, president of the Antioch Lions, represented the local club. Dancing followed the program and dinner.

## BOY! WHAT A LINE TO BUCKI

## HUNTERS PREPARE FOR DUCK SEASON; OPENS HERE NOV. 1

### Nimrods Warned to Know Game Laws Before Shooting

With the Illinois game season not far in the offing and hunters making every preparation to get their share of wild fowl which seem to be plentiful this year, officials of the conservation departments in all mid-western states are warning those who hunt to inform themselves as to the "rules of the game" before venturing forth with a gun.

The following information may prove helpful to those who plan to hunt in this locality this season:

**ILLINOIS**—The duck season starts at 7 a.m. Monday, November 1. The state license is \$1.50. The duck stamp costs \$1. Every waterfowl hunter needs both. The bag limit on ducks is 10 a day and 10 in possession. No live decoys and no artificial feeding or baiting will be permitted in the marshes. Guns for waterfowl hunting cannot hold more than three shells at a time. This goes for hunting all game in Illinois—rabbits, pheasants, squirrels, ducks or any bird or animal recognized as game by the Illinois code. No hunter may shoot on or across any highway in the state.

**The Pheasant Season**

The Illinois pheasant, rabbit and quail season opens on November 10. The pheasant season extends through the 15th—the same as last year. The limit will be two cocks a day and six in possession. Illinois quail season extends through Dec. 9 and the limit is 12 Bob Whites a day.

There seems to be a misapprehension about jacksnipe hunting. Some hunters think Illinois has an October snipe season. This is not so. The jacksnipe, duck, goose and sandhill seasons open at the same time—Nov. 1, at 7 a.m.

**About the Cost**

The cost of renting a duck blind along the Illinois river, doubtless will be about the same as last year.

Already there are lots of ducks along the Illinois, especially bluewing teal. These birds will be gone by Nov. 1. But for every teal that has left there will be 100 mallards and pintails!

**WISCONSIN**—The duck season opens Oct. 9. The nonresident license is \$25. If a nonresident wants to shoot pheasants (and nothing else) on a shooting preserve his license will be just \$5.00.

## City Briefs

J. R. Cribb was taken to the Victory Memorial hospital in Waukegan Saturday for treatment and possibly an operation later. Last night his condition was reported to be improved. Also being treated in the Victory Memorial hospital are Miss Doris Mason, grade school teacher here, and Edward Imboden, the tailor, who has been there for the past two weeks.

Mr. and Mrs. E. F. Vos attended the charter night meeting of the Kenosha Lions club held at the Elks club last night. Mr. Vos, president of the Antioch Lions, represented the local club. Dancing followed the program and dinner.

## Rev. Sitler is Granted Year's Leave of Absence

Rev. Loyal V. Sitler, four years pastor of the First Methodist church of Antioch, has been granted a year's leave of absence by the Rock River Conference to become effective at the close of the conference sessions being held in the Court street church in Rockford this week.

Rev. and Mrs. Sitler left late Tuesday afternoon for Rockford where the local pastor will attend the conference and wind up the business connected with the local pastorate, and Mrs. Sitler will visit her mother and other relatives in Byron, Ill., during the week.

Upon their return the Sitlers will move to Waukegan where Mr. Sitler has taken a position with the Lake College of Commerce. The family will reside at 124 Juniper street, where they will be at home to their friends after October 15.

Besides serving an eminently satisfactory pastorate with the local congregation, both Rev. and Mrs. Sitler have been helpful in many of the community's civic activities during their residence in Antioch.

## Local Veterinarian at U. of I. Meeting

Dr. G. W. Jensen, Antioch veterinarian, left yesterday to attend the annual veterinary conference which begins today and lasts through Saturday at the College of Agriculture, University of Illinois. More than 200 of the leading veterinarians of the state are expected to attend the session for the purpose of reviewing the latest information about control of livestock and poultry disease.

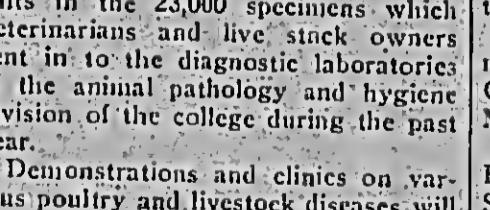

Dr. Jensen is scheduled to preside at the morning session Friday when mastitis symposium will be the subject before the veterinarians. Dr. Jensen will be on the program again at the evening session Friday when he will discuss "Some Phases of Cattle Practice" (Infectious Keratitis—pink eye).

**Huge Live Stock Losses**

All the major diseases which are now causing losses among the 266 million dollars worth of livestock on Illinois farms will be considered at the conference, but special attention will be given to mastitis in dairy cattle, rabies, Bangs' disease, and poultry diseases.

Another feature of the meeting will be a discussion of the findings and results in the 23,000 specimens which veterinarians and live stock owners sent in to the diagnostic laboratories of the animal pathology and hygiene division of the college during the past year.

Demonstrations and clinics on various poultry and livestock diseases will close the program.

Jeanette Julia, 6 lbs., 13 oz., arrived at Victory Memorial hospital, Waukegan, Sunday, Oct. 3. She is the daughter of Mr. and Mrs. Albert Shepard of Antioch.

Mr. and Mrs. George Lynch are the parents of an eight-pound son, Martin Andrew, born Tuesday, Oct. 5, in the Illinois Central Hospital in Chicago.

## TWO ARE DEAD, 13 ARE INJURED ON COUNTY HIGHWAYS

### Two Wis. Youths Killed; Harold Nelson Hurt in Crash

Two dead and 13 injured in highway crashes was Lake county's traffic toll over the week-end.

The dead are Alvin Schulst, 19, of Waukesha, and Harold Lang, 20, of Burlington, Wis., who were killed Sunday when their car driven by Lang struck the concrete abutment at the intersection of Skokie road and Grand avenue. It is presumed the driver lost control of his car when approaching the ramp at the grade separation. Schulst was killed instantly and Lang died in St. Therese hospital two hours later. James Storck, 20, also of Waukesha, and a passenger with the Wisconsin youths was critically injured and was taken to the hospital.

These deaths bring the traffic deaths to 28 in Lake county for this year. Last year 44 were killed in highway accidents.

**Harold Nelson in Crash**

Among those injured in highway crashes Sunday was Harold Nelson, Antioch boy, who was badly cut when his head was dashed through a windshield in a collision on Grass Lake road. Harold was a passenger in a car being driven west by John Einer, son when the driver pulled to the right side of the road to avoid striking a trailer that is said to have had no tail light. In doing so the car collided with one driven by Charles Hayorka, of Bellwood, Ill. Harold was brought to the office of Dr. Bratude in Antioch where it was found he was badly cut about his head and face. He is recovering at the home of his parents, Mr. and Mrs. S. B. Nelson of

## Fire Prevention Week

Fire Prevention Week is here. What are you going to do about it?

If you are short sighted, you will do nothing. If you have any interest in protecting your property and your family's lives, you will use fire prevention Week as an occasion for taking the simple, essential measures that usually suffice to make homes and places of business safe from the most common and dangerous fire hazards.

Fire Prevention Week is not designed to sell anything. It is designed to serve—to conserve—to protect. During the Week insurance companies, civic bodies, fire experts and public officials will use the radio, newspapers, displays and printed literature in an effort to make you think and to make you act.

In the average home grave hazards exist of which the owner knows nothing. Ignorance, as well as carelessness, is a prolific source of destructive fire.

The simplest and most easily corrected causes are responsible for the great bulk of fires in dwellings. A slight fault in a heating plant may devastate a home. Accumulations of papers, clothes, furniture and other odds and ends require only a spark to burst into flame. Improperly stored fluids such as gasoline, benzine and kerosene are a constant menace. Amateur repairs of electric appliances and light cords cause millions of dollars' loss annually. Paint or oil-soaked rags are often the cause of spontaneous combustion. An improperly protected hot electric iron, or cigarette ashes invite fire.

It costs you nothing to eliminate these hazards, and takes little time. The small effort may save you thousands of dollars—and infinitely more important, save a life. Fire prevention Week was inaugurated to serve you. Make the most of it.

## \* \* \* \* \*

## America's Legion

This community, like every other, has its contingent of American Legionnaires. Nearly a score of years ago they returned triumphant from the Great War and became citizens to whom we point with pride. Today we can look upon them doubly proud because the American Legion has demonstrated itself as typifying the true spirit of Americanism upon which this nation was founded.

In New York City recently some 300,000 Legionnaires paraded that spirit up fabulous Fifth Avenue for 18 hours in the most amazing demonstration ever witnessed by that blase metropolis. Up that fashionable thoroughfare—scene of May Day parades when the red flag of Communism is flaunted and where the flags and

## WILMOT

Mrs. Guy Loitus returned Tuesday from a visit of several days at Detroit with Mr. and Mrs. Dean Loitus.

The Misses Margaret Fitzgerald and Margaret Elverman motored to Baraboo, Tuesday afternoon.

Dr. M. W. Alcorn spent Wednesday morning examining the children in the Wilmot Graded school. This work is sponsored by the Wilmot Mothers Club.

The Wilmot Volunteer Fire Department met in regular session Tuesday night. A social card party is planned for the near future. A chicken dinner was served by the committee in charge of food for this meeting.

The Mothers Club held a business meeting at the school on Wednesday evening, Oct. 6. Dr. M. W. Alcorn addressed the meeting on the subject of Preventive Medicine.

Glen Pacey, a U. F. H. School graduate class of 1934, now a student in the agriculture department at Madison is a member of the Agriculture Judging team that is judging at the National Dairy Cattle Congress now being held at Waterloo, Iowa. Tuesday it was announced over the Farm and Home Hour on WMAQ that Glen had been awarded second place in judging horses, on that day. He is a member of the Fat Stock Judging team at the University and is sent many places on judging trips.

The Wisconsin County Magazine in writing up Personalities of the Month for October has this to say about Bob Van Lier, Salent, a former U. F. H. School graduate, Class of 1934: "Bob Van Lier (Senior) tall, blond, is a native of Salem. His proudest possession is a twin sister. Bob is a devoted member of Saddle and Sirloin in which he centers most of his outside activities, notably chairman of the Dairy Cattle division of last year's Little International. He has participated in Dairy Cattle judging . . . .

The County gravel trucks have been working the past week completing the fill of the old mill race at the dam.

Mrs. Will Hedegard and son, Dick of Clermont, Minn., are visiting her parents, Mr. and Mrs. Charles Kanis. Mr. and Mrs. Charles Kanis and son, Warren; Viola Kanis, Mrs. Will Hedegard and son; Mr. and Mrs. Adolph Marcusson; Mrs. William Lake; Adele Doberstein; Mrs. L. Gandy, Jr.; Mrs. L. Stoxen; Irene White and Melvin Lake and August Holtord were in Milwaukee Saturday for the funeral services for George Marcusson.

Mrs. M. M. Schnurr entertained at bridge on Thursday and Friday nights.

Miss Marguerite Fitzgerald of Oconomowoc, who has been acting principal of the Wilmot Graded school, has resigned to accept a position in the Reedsburg High School. Mrs. Gordon Dix, of Salent, is acting as substitute teacher.

Mr. and Mrs. Charles Olsen and daughter, Fort Atkinson, were weekend guests of Mr. and Mrs. Ray Rudolph.

Ruth Shottiff is in Chicago for a few weeks.

Mr. and Mrs. R. Marzah and chil-

soap box champions of other "isms" beg attention and followers—the American Legion paraded the American flag and demonstrated to the millions who lined the avenue that there is still a deep patriotic reverence for that flag and the Constitutional rights of every one of this nation's 130 million citizens.

In convention the legion delegates did not ponder political and partisan issues but voted on matters of far greater national import. They voted to ask Congress for an investigation and deportation of those alien "ism" groups and they reaffirmed their faith in the Bill of Rights as a living document designed for the protection of the humblest citizen.

\* \* \* \* \*

## Birds of a Feather

There is an old saying that where there is smoke there must be fire. It is also true that when your friends and enemies agree in a judgment upon you, they are likely to be right. Let's look at the C. I. O. with that as a yardstick.

One day recently, William Green, President of the American Federation of Labor, said that continued use and defense of the sitdown strike by C. I. O. sympathizers was "evidence of the communist influence."

"We know that a large number of known communists were on the payroll of the C. I. O. in organizational work in the automobile and steel industry strikes," said Mr. Green.

And, on the same day here is what Israel Amitar, New York state communist organizer, had to say: Communists in the C. I. O. have become "extremely influential."

Followed by Earl Browder, general secretary of the Communist party in the United States, who said: "We can say we are in harmony with the policies of the C. I. O."

## The Most Valuable "Crop"

While adult farmers are struggling with the problems of production and marketing, a splendid new "crop" of farmers of the future is growing up.

More than a million farm boys and girls are now enrolled in the 4-H clubs. Here they are learning practical lessons in successful agriculture. On a not distant tomorrow, they will be operating the nation's farms, organizing and running the nation's farm marketing cooperatives and working out the problems of the day.

The fact that organization of farm youth has now reached its highest point in history augurs well for the agricultural future. The training and information these young farmers receive in their 4-H clubs and elsewhere will prove invaluable.

Mr. and Mrs. Clyde Buiton and children of Kenosha were guests on Sunday of Mr. and Mrs. Ray Buiton. There will be English services at the Peace Lutheran church at 9:30 next Sunday morning.

Adele Doberstein, Pistakee Lake,

was a week-end guest of Mr. and Mrs. Charles Kanis.

Week-end guests of Mr. and Mrs. F. Burroughs were Mr. and Mrs. Blair Wilbur and son and Mr. and Mrs. G. W. Lewis and daughter, Laura Lee, of Milwaukee. Saturday night Mrs. Burroughs accompanied the Lewis family to Milton, where Billy Lewis played on a Milwaukee foot ball team against Milton.

Mr. and Mrs. George Higgins entered Mr. and Mrs. Max Miller and daughter of Genoa City and Mr. and Mrs. David Kimball at a birthday dinner Sunday honoring Mrs. Kimball.

Mr. and Mrs. J. Bryden, Chicago, spent Sunday with Mr. and Mrs. George Faulkner.

Recent guests of Mrs. Hattie Pacey were: Miss Ethel Dammon, Omaha, Nebraska; Mrs. Harry Wuttke and Miss Oldenburg, from Browns Lake.

Mrs. H. Sarbacher left Tuesday for a week at Madison where she will attend the Grand Chapter of the O. E. S.

Mr. and Mrs. Don Herrick and Mr. and Mrs. Russell Elwood and son of Chicago spent Sunday with Mr. and Mrs. H. McDougall.

Ruth Thomas and Grace Carey were

in Milwaukee on Saturday.

The U. F. H. School football team defeated Union Grove 46-0 Wednesday afternoon. The local team will play with Rochester at Wilmot Friday afternoon, October 9. This promises to be a very exciting game as the Rochester team has a very good rating. It will be a conference game.

## The Poodle Dog

The standard poodle is frequently known by the erroneous name, "French poodle," a non-existent variety. The so-called French poodle is a German breed. The word "poodle" is derived from the German "pudel," applied to the breed because it retrieves from the water.

Strictly speaking, it is the "canis familiaris equinus." In France, the breed we know as the poodle is called the "caniche," which derives from "chien canne," which translates into "duck dog." To go a bit further in debunking the "French" part of the poodle: it was in France that the hair was first clipped from the dog so that it could swim better, but it was the English who developed fancy clipping.

Use of Words In, Into, In, To

Broadly speaking, In denotes rest; into, motion. William knell in the long grass; Herbert went into the house. But the two words should be written separately where their meaning is separate. The Smiths have moved into their new house;

we all walked to the village hall, where we went in to hear the concert. Similarly with on and on to.

Ethel danced on the table; Henry jumped on to the seat.—Til-Bits Magazine.

## TREVOR

Charles Curtis, Kenosha, was a Trevor caller Wednesday.

A. J. Baethke was a business caller in Burlington Wednesday.

Gail Platts, Twin Lakes, was a caller at the Mrs. Luanah Patrick home Monday.

Mr. and Mrs. Raymond Howard of Saraman Lake, New York, and the former's mother, Mrs. Adolph Murk, and Mrs. Herman Ludwig, Kenosha, were Trevor callers Monday.

Mr. and Mrs. John Matis entered Sunday a large number of relatives from Chicago.

Sunday callers at the A. J. Baethke home were their sons, Walter Baethke, daughter, Valeita and son, Raymond, Antioch; Edgar Baethke and wife, Mr. and Mrs. Charles Hahn and Mrs. Herbert Baethke, all of Forest Park, Ill.

Dennis Copper, Chicago, is spending this week with his grandmother, Mrs. Mattie Copper.

Mr. and Mrs. Ed Yopp entertained at dinner Sunday in honor of their daughter, Dolly's fifth anniversary, the following guests: Mr. and Mrs. Jack McCarthy, Philip Dennis and Miss Sally Bell, Mr. and Mrs. Ed Haley, Chicago, Mr. and Mrs. Earl White, DesMoines, Iowa, Mrs. Laura Yopp, Mr. and Mrs. John Yopp, Grass Lake, Mr. and Mrs. Bill Yopp, Moundeem, Ill. A number of little folks were entertained namely: Billy Yopp, Roy and Ralph Yopp, Dennis Copper, Shirley Schmidt, Joy Hilbert, Priscilla Allen, Patsy and Marie Barlyte, and Joseph Fernandez, Jr.

Mrs. Alice Terpning, Miss Sarah Patrick and nephew, Milton Patrick, visited their brother, Hiram Patrick, and the William Kruckman family at Burlington, Sunday.

Mr. and Mrs. Neilson and son, Gilbert, Racine, were Sunday visitors at the Alfred Dahl home.

Bette Carlson, Paris Corners, is making an indefinite stay at the Char-

ting home were their son, Carl Octing, Mankato, Minn., Mr. and Mrs. Howard Mathews and brother, S. Mathews, Oak Park, Ill.

Mr. and Mrs. Hugo Bauer and nephew, Johnnie Bear, Chicago, spent over the week-end at their cottage at Shore View.

Mr. and Mrs. Joseph Jetcock and son, Joseph, Jr., Chicago, spent the week-end and Sunday with Mrs. Jetcock's parents, Mr. and Mrs. Otto Leitke.

Mr. and Mrs. John Matis entertained Sunday a large number of relatives from Chicago.

Sunday callers at the A. J. Baethke home were their sons, Walter Baethke, daughter, Valeita and son, Raymond, Antioch; Edgar Baethke and wife, Mr. and Mrs. Charles Hahn and Mrs. Herbert Baethke, all of Forest Park, Ill.

Dennis Copper, Chicago, is spending this week with his grandmother, Mrs. Mattie Copper.

Mr. and Mrs. Ed Yopp entertained at dinner Sunday in honor of their daughter, Dolly's fifth anniversary, the following guests: Mr. and Mrs. Jack McCarthy, Philip Dennis and Miss Sally Bell, Mr. and Mrs. Ed Haley, Chicago, Mr. and Mrs. Earl White, DesMoines, Iowa, Mrs. Laura Yopp, Mr. and Mrs. John Yopp, Grass Lake, Mr. and Mrs. Bill Yopp, Moundeem, Ill. A number of little folks were entertained namely: Billy Yopp, Roy and Ralph Yopp, Dennis Copper, Shirley Schmidt, Joy Hilbert, Priscilla Allen, Patsy and Marie Barlyte, and Joseph Fernandez, Jr.

Mrs. Alice Terpning, Miss Sarah Patrick and nephew, Milton Patrick, visited their brother, Hiram Patrick, and the William Kruckman family at Burlington, Sunday.

Mr. and Mrs. Neilson and son, Gilbert, Racine, were Sunday visitors at the Alfred Dahl home.

Bette Carlson, Paris Corners, is making an indefinite stay at the Char-

ting home.

"Policeman of the Forest"

"Policeman of the Forest" is the title given the alert, noisy and quarrelsome Jaybird. His wild cry sounds like "The! The! Thief!" James Whitcomb Riley, Hoosier poet, termed the Jay "full o' sass—in them baseball clothes of his." And, despite his glorious colors, the Jay is a member of the crow family.

THURSDAY, OCTOBER 7, 1937

THE ANTIQUE NEWS, ANTIOCH, ILLINOIS

**LAKE VILLA**

Mr. and Mrs. Carl Eckdahl made a business trip to Morris, Ill., last Saturday.

Miss Catherine Bochim, who is employed at the Foulds Milling company office in Libertyville, entertained a group of her girl friends from the office at a party at her home last Thursday evening.

The Royal Neighbor Officers' Club will hold a public card party at the home of the Receiver, Mrs. C. B. Hamlin, on Wednesday afternoon, Oct. 15th, and visitors are very welcome.

Frank Matthijs and son of Chicago spent last week with his sister, Mrs. J. A. Pedersen.

August Rentner spent several days last week helping his son at Antioch.

Mr. and Mrs. Clarence Miller and baby daughter of Chicago were at the Miller home Sunday.

Mr. and Mrs. Wagner of Chicago were guests of Mr. and Mrs. William Sheehan last Sunday.

Mrs. Dan Sheehan, who suffered severe burns when their kitchen caught fire a short time ago, is in St. Therese hospital for treatment.

Arthur Thayer of Lake Geneva and Mr. and Mrs. Earl Clagg of Evanston called on Mrs. Louis Thayer last Sunday.

Mr. and Mrs. Henry Potter of Waukegan called on friends here last Wednesday and also attended church here on Sunday.

Mr. and Mrs. W. G. Hucker are spending a few weeks at their cottage at Chetek, Wisconsin.

Mr. and Mrs. R. H. Sherwood left this week for Florida to spend the winter after a pleasant summer with their son, Clare Sherwood, and family.

E. K. Hart spent Saturday night and Sunday with his mother and sister in Chicago.

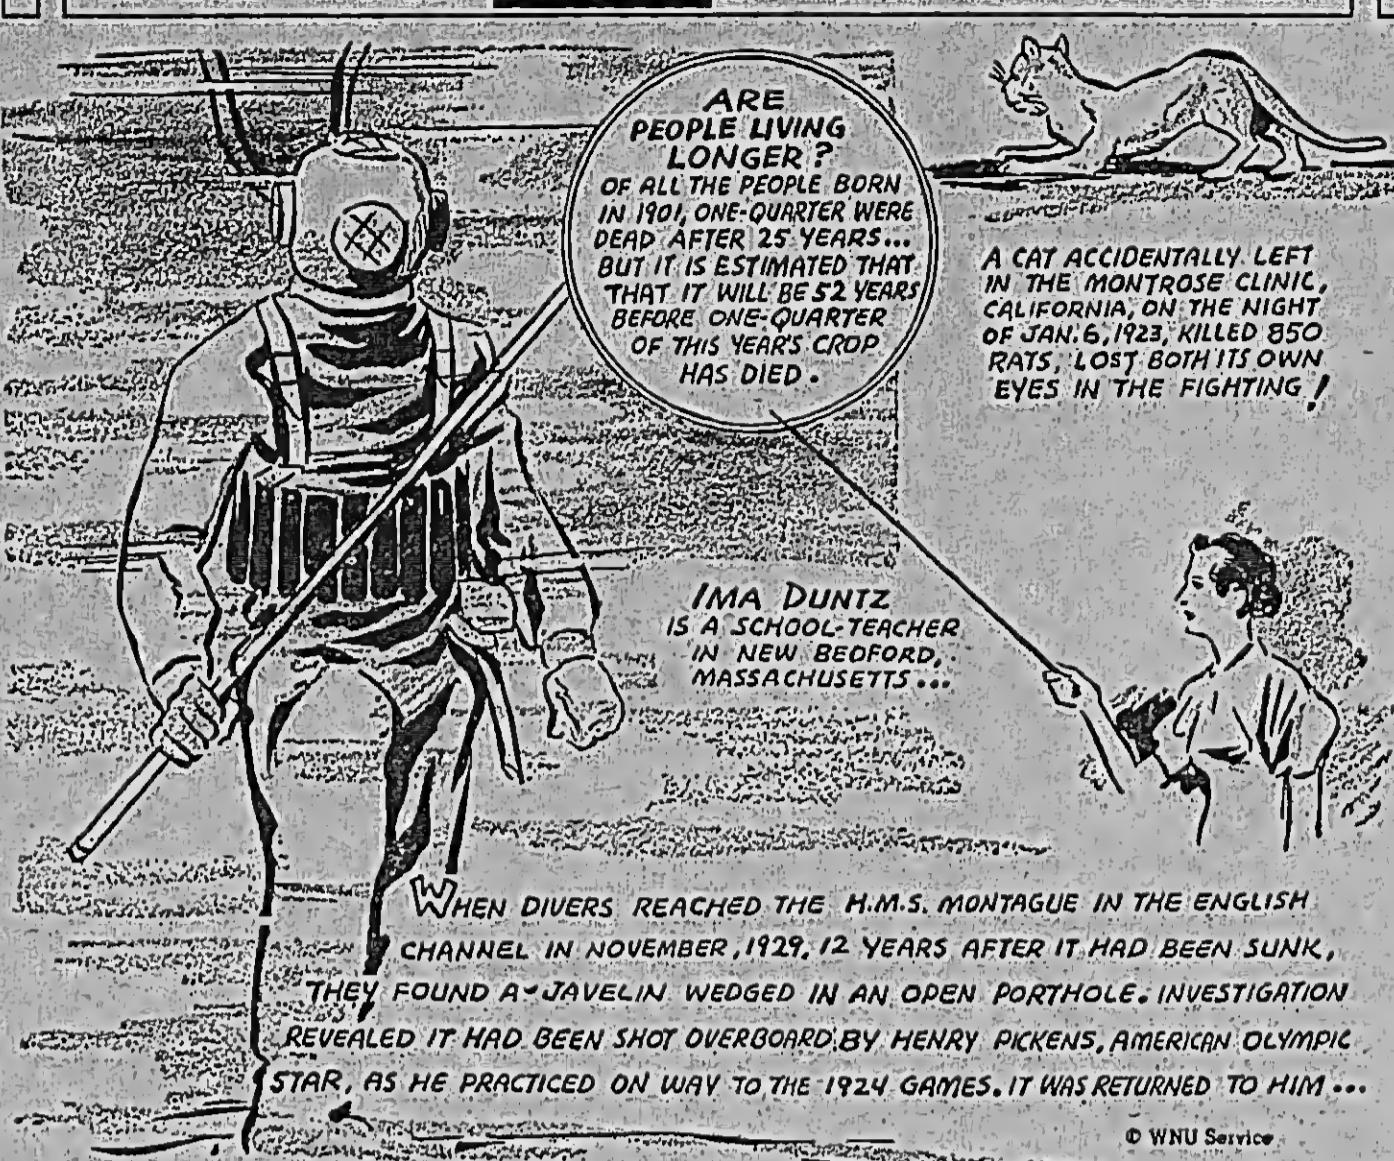

Rev. L. B. Allen is attending conference of ministers of the Chicago Northern district at Rockford this week, besides attending to studies at Garrett Biblical Institute. There will be no church services or Sunday school next Sunday at Rev. Allen will be at Rockford for the services that day.

Rev. Allen officiated at a wedding at the parsonage Sunday evening and united in marriage Miss Ida Fink and Mr. John Scofield, both of Chicago.

Miss Betty Reinebach, a freshman at U. of Illinois, spent Saturday and Sunday at her home here.

Mr. and Mrs. Horace Culver visited their daughter, Jean, at U. of I. at Champaign last Sunday.

Miss Valeria Slazes, who will soon become the bride of Elmer Sheehan, was the guest of honor at a miscel-

Miss Dutz led her class all through grammar school, every year in high school and every year in teachers college. Her mother, by the way, was Miss Ima Rabbit before she married Joseph Dunz.

The remarkable progress in increasing life expectancy is due to marked decrease in the infant mortality rate. But the expectancy for a person of fifty, for instance, is about the same as it was a century ago. That means that science has been able to do practically nothing about curbing the ailments which kill old people.

lanuous shower at the Reinebach home last Wednesday evening, and received many beautiful and useful gifts to use in her new home.

Miss Elsie Swanson has taken over the beauty shop operated by Miss Valeria Slazes and began her new duties Monday morning. Elsie has recently completed her course in this line of business and is fully competent to carry on the business. We wish her success.

Mrs. C. Blumenschein was hostess Saturday evening to a group who honored Mrs. Lloyd Barnstable, nee Ada Eyre, recent bride, with a miscellaneous shower, and the gifts were many and beautiful.

Mrs. Leonard who has been very ill, is improving. Her daughter, Mrs. Joe Eberle of Chicago came out last week to help care for her.

Miss Valeria Slazes, who will soon become the bride of Elmer Sheehan, was the guest of honor at a miscel-

lanous shower at the Reinebach home last Wednesday evening.

Mr. and Mrs. J. S. Denman, with Mr. and Mrs. Arthur Leng of Grayslake, spent Tuesday in Rockford, attending an annual Insurance meeting.

Miss Doris Jamison and Mrs. Cora Brewer were dinner guests at the E. A. Martin home.

Webb Edwards returned to Forest Park after a week's visit with his grandparents, Mr. and Mrs. D. B. Webb.

Miss May Dodge spent several days with her cousin, Mrs. Mina Gilbert in Waukegan.

Mr. and Mrs. E. A. Martin and Richard were callers at the Earl Henry home at Rosecrans Sunday afternoon.

Cause of John Bunyan's Death  
In the summer of 1688 John Bunyan undertook to plead the cause of a son with an angry father, and at length prevailed on the old man not to disinherit the boy. This good work cost him his life. He had to ride through heavy rain and came drenched to his lodging when he was seized with a violent fever and died in a few days.

## Personals

Parker and Stanton Hazen and Mrs. Elsa Reetski spent Tuesday in Chicago.

Miss Elizabeth Webb and Mrs. Irving Elms returned home Monday from a week's vacation trip to New York City and Ohio.

Mrs. Louise Gillett of Chicago spent Saturday with her parents, Mr. and Mrs. J. C. James.

Mr. and Mrs. Robert T. Wilton and son, Charles, and Miss Anna Mae Turnock left Tuesday morning for Beatrice, Nebraska, where they will visit Mr. Wilton's aunt, Mrs. C. E. Wilton and family. Miss Maryette Wilton who has spent the summer in Nebraska, will return home with them.

Mr. and Mrs. Andrew Dalgaard left Sunday for a week's vacation and visit with friends at Chetek, Wisconsin.

Mrs. Ernest Plotz of Round Lake spent Monday with her aunt, Mrs. M. J. Zimmerman.

Miss Clara Sherwood is visiting her mother at Black River Falls, Wisconsin, this week.

Dan Williams of Chicago spent the week-end in Antioch with his parents, Dr. and Mrs. R. D. Williams.

Norman Edwards, Virgil Horton and Henry Quedenfeld, together with their instructor, C. L. Kutil, attended the Illinois-DePaul football game at Urbana last Saturday.

Mr. and Mrs. Charley Kyser of Colorado are guests this week in the home of the former's nephew, George Schobert and family at Loon Lake.

Mr. and Mrs. James Lynch departed Thursday for Portland, Oregon, after having spent the summer here at the home of his mother, Mrs. Andrew Lynch. Jim expects to take up his old position with the merchant marine, with Portland as his headquarters.

Mr. and Mrs. William Agricola visited Mr. and Mrs. Leslie O'Hare of Waukegan Sunday.

Mr. and Mrs. Theodore Dooper entertained Sunday evening in honor of their son Billie's third birthday. Those present were: Mr. and Mrs. William Haddican, son Robert, Mr. and Mrs. William Dorsey and daughter, Marcella Ann, Mr. and Mrs. Ed Ypma and family, Miss Jennie De Boer, Mr. and Mrs. William Agricola, Miss Mary Dorsey, and James Dorsey.

Mr. and Mrs. N. E. Sibley and Dr. and Mrs. D. N. Deering returned Tuesday from a ten-day fishing and vacation trip to Northern Minnesota and Canada. That they were successful with rod and reel is attested by the gifts of fine fish sent to friends here, including 20 fine wall-eye pike sent to Antioch firemen.

Yes, sir, the bluegills are biting in the shallow waters of Marie and other nearby lakes, and local anglers are having the time of their lives during the last few days. For many weeks the fishing has not been so good around here.

Ira Simons has returned from a week's vacation trip to Northern Wisconsin.

Mr. and Mrs. Richard Kavanagh of Kenosha were dinner guests Wednesday evening in the home of the latter's parents, Mr. and Mrs. Herman Radtke.

Mrs. Dora Sabin returned Monday from Springfield, Ill., where she had been the guest of her daughter-in-law, Mrs. Merrill Sabin, for the past two weeks.

Harold Kellogg of Los Angeles, Calif., was the guest of his grandfather, J. R. Cribb, last Thursday and Friday.

Mrs. Gladys Groth and Mrs. Howard Gaston spent Wednesday in Milwaukee.

Mrs. Murry Horton.

## Card of Thanks

I wish to thank my many friends and relatives who so kindly remembered me on my birthday with cards, flowers and best wishes.

Mrs. Murry Horton.

## First Pure Milk Laws

The first milk regulation on record was passed in Glasgow, Scotland, in 1809. This law prohibited the dilution of milk with water. Earliest attempts at milk control in the United States occurred in Massachusetts. In 1850 a state law was passed prohibiting the adulteration of milk. In 1859 a Boston milk inspector was appointed.

"Here Lies the Jinx"

A wooden cross with the words, "Here Lies the Jinx," marks the center of a small burial plot at the Buckhorn mine, 80 miles northwest of Eureka, Ariz. Miners at the camp buried their "Jinx," a piece of broken mining machinery that caused them considerable trouble in a fenced-in grave in a conspicuous place.

Many Fell for the Camorra

The Camorra, a criminal secret society which was organized in an Italian prison in 1820 and existed until 1911, once camouflaged its thieving, smuggling and blackmailing so completely by its good deeds in social and political circles that many princes, statesmen and even dignitaries of the church became members, according to *Collor's Weekly*.

## Fun On A Small Budget

HAVING fun out of life, even though you haven't much money, is a matter of ingenuity worth cultivating, declares Marjorie Hills, author of the best-seller "Live Alone and Like It" and "Orchids On Your Budget."

"The truth is, that the most exciting things, and the most satisfying things, can't be just bought and paid for," said Miss Hills, who will discuss "Small Budgets" when guest speaking on *Columbia's "Heinz Magazine of the Air,"* Oct. 1st.

"You might have a million dollars and no taste," continued Miss Hills, "and furnish a brand new house with all the most expensive things you could find, and have it still look ugly and unattractive. Or you might have very little money and really good taste, and hunt around for bargains and auctions and furnish a little second-hand store and furnish it really charming house. This is just as true about your clothes, the meals you serve and the parties you give.

"Too many women take their financial limitations in such a limp and spiritless fashion. They use it as an excuse for letting their houses and wardrobes and their complexions run down. It's much more fun to wangle a few orchids on your budget, the gay things that you yourself get a kick out of."

"There's no limit on what you can do in your house for next to nothing. Clearing out the clutter is usually the first step, to give a feeling of space and freshness. Paint helps a lot, and use inexpensive but smart decorations. Send those useless knick-knacks to the Salvation Army, and take down most of the pictures.

"Of course clothes are not cheap on most women's budgets," added the author, "and the best orchid of this kind is just a smart becoming costume, which most women could get for less than

they spend by following a few good basic rules.

"Stick to one color scheme, instead of starting with brown and then breaking down and getting a black hat, because you're in a hurry, and a blue bag because you see it in a magazine. Get clothes that can go a lot of places, and not just to a wedding or tea."

"Of course, grooming is as important as clothes, and that is as much a matter of not being lazy as of not being rich. Any woman's worst moments are when her hair is out of curl or her complexion makes looking into a mirror painful. The girl or woman who always has an orchid, a figurative one," said Miss Hills, "is a better secretary, a better business woman, and a much better wife."

Wears Shabby Wedding Clothes  
There's nothing gay about the wedding clothes which the Austrian peasant bride wears for the occasion. She discards her bright and elaborate costume and dons an ill-fitting black alpaca coat and skirt.

THE ANTIQUE NEWS, ANTIQUE, ILLINOIS

## Lake Villa School Notes

Each week we are trying to write a little piece of School news. We all felt proud when we read our school news in the Waukegan News-Sun.

On Wednesday of last week Mrs. McLaren took the girls in the Upper grade room to the ball game at Grayslake. We lost the game. Ervin Barnstable hit a home run and received a nickel for an ice cream bar.

Last Friday afternoon each child had a current event, after which we heard a few book reports and then all worked on Art.

On Tuesday of this week we had movies and we all saw actual pictures of irrigation and how it is done and the value received from the same. We have read a lot about irrigation and now the movies helped to make us better understand irrigation.

This week is "Fire Prevention Week," and we are having Mr. Marks, of the Cheaney Farms, speak to us on fire prevention. We also expect to have several fire drills.

The Antioch Grade School is to play here on Wednesday of this week and Round Lake School is to play here next Monday.

Last week, Mr. Frank Smith, of Waukegan, inspected and refilled all of our fire extinguishers.

Lois Parsons, one of the Intermediate room pupils, sang three songs at the Times Theatre, in Waukegan, on the Amateur program and we are proud to say, she won the first prize which was five dollars, and also a trip to Chicago to sing on the Maurice B. Sachs program.

The Intermediate room was presented with three transportation pictures illustrating travel by land, air and water.

The Intermediate room is having a club. We have made our account book. Every week we give a penny. At the end of the year we hope to purchase some useful article. It is interesting to keep an account book.

We also have new plants and flowers. They are very pretty. They decorate our room very nicely.

The students of this school are helping to prevent the spread of rabies by keeping all dogs off the school grounds and being very careful around them outside of school. We are all trying to keep our dogs at home and not let them run around.

Suzie Weber was not in school on Monday as she had a bad cold and stayed at home.

The primary room received some new books this morning called the "Alice and Jerry" books. These books were bought with money that we earned from the Operetta last year. We like the books very much because they have pictures along the top and bottom of each page. We get to read when we are finished with our other reading lessons.

We have also been studying in the primary room all about fall plants. We have some milkweeds, leaves, twigs and seeds. We learned how the seeds are carried all over so that new plants will grow.

## HICKORY

Mrs. Henry Hunter entered the Burlington hospital Saturday as a medical patient.

Mr. and Mrs. Curtis Wells, Mrs. Nettie Wells, and Mr. and Mrs. O. L. Hollenbeck spent Sunday with relatives at Hinsdale.

Miss Josie Mann of Waukegan spent Sunday at the A. T. Savage home.

Mr. and Mrs. Ralph Fields and daughter, Hazel, were Waukegan shoppers on Friday.

Mrs. Ellen Tillotson spent Sunday at H. A. Tillotson's.

Mr. and Mrs. E. W. King and family attended the Hunt Club's annual dinner on Sunday. Mrs. King received a gate prize, a 20-pound turkey.

Mr. and Mrs. Wm. D. Thompson and Helen, also George A. Thompson of Zion called on Miss Bertha Crawford, in Waukegan hospital Sunday afternoon.

Curtis Wells spent from Thursday until Saturday night in Missouri.

Nels Hansen returned home from a Kenosha hospital on Friday.

Mr. and Mrs. Lloyd Winnans and family from Maywood visited their cousins, Mr. and Mrs. A. T. Savage and family, Friday evening.

Mr. and Mrs. Hugo Gussarson and son, Ralph, spent Sunday at Woodside, Illinois, visiting Mr. and Mrs. Louis Milling and family.

Miss Dorothy Hunter of River Forest was home over Sunday.

**Hava Large Plutary Glands**  
In some glots and gaintees, according to Collier's Weekly, the plutary gland, which influences growth, is forty times larger than the normal size.

**Camels' Feet Heavily Padded**  
Camels' feet are so heavily padded they do not sink in sand. So the brute is not only sure footed but fast. A racing camel can speed 100 miles a day.

**Names of Mayflower Children**  
The four children of William Brewster, who came over on the Mayflower, were known as Love, Wrestling, Patience and Fear.

**Much Energy From Radium**  
During its life radium gives off 1,000,000 times as much energy as burning coal. A gram of radium equals 3,000 pounds of coal.

Worrying is so bad that some folks let their creditors do all of it.

## HEADLINES FROM THE LIVES OF PEOPLE LIKE YOURSELF!

## "Human Conduit"

By FLOYD GIBBONS

Famous Headline Hunter

## HELLO EVERYBODY:

Cosimo J. Mancino of South Beach, Staten Island, had an idea a while back. "I have been reading your column for quite a while," he writes, "and every time I read it I said to myself, 'Boy, that fellow had a close one,' without ever thinking for a minute about the close shaves I have had myself."

All I'm wondering about is why Cosimo didn't have that swell idea before, because he is an electrician, and most any electrician has had a close call or two with a mess of current. Why I've printed yarns in this column about lads who have engaged in boxing matches with upward of thirty-thousand volts of the stuff. That's where Cosimo's yarn is different. In fact, it's a doggone swell warning to all of us, whether we're electricians or not. Cosimo had his scrap with just a hundred and ten volts of current—the same amount that lights the lamps in your house and runs your electric refrigerator.

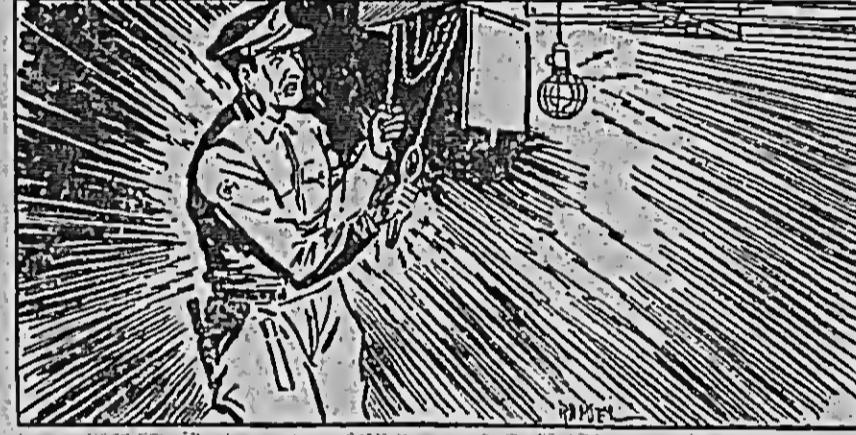

"People will tell you 110 volts is not dangerous," Cosimo says, "but don't let them fool you. Look at what happened to me!"

And what happened to Cosimo? Well, that's the story. If you live in Stapleton on Staten Island, maybe you know where Smith's Lunch is. On July 15, 1934, Cosimo got a call to go there and fix a refrigerator that wasn't running properly. Cosimo got on the job and began looking for the trouble. The wires ran down through the floor and along the ceiling of the cellar. There they ran into a junction box, and he opened that up to pull the metal cables out and make a test to find out if they were grounded.

## Juice Was Shooting Through Cosimo.

Now Cosimo goes into a lot of detail about that job he was doing. He talks about ground legs, and secondary grounds, and polarized system and what not, until I get so dizzy that I can't tell my right hand from my left. Maybe Mr. Albert Einstein could give you all the dope about that job, written so an electrician could understand it. But as near as I can figure out, Cosimo was fooling with a hot wire that was grounded on a water pipe, and at the same time he was standing on a cellar floor that was pretty wet. The motor was running, and juice was going through that wire about a mile a minute when a wire snapped.

Cosimo had his pliers on that wire when it broke—and all of a sudden his fingers tightened and his body went stiff. Before it broke, that wire

His Fingers Tightened and His Body Went Stiff.

had been feeding current along its other half. Now it was feeding that same current through Cosimo. He had cut himself in on the circuit—turned himself into a human electric wire—and the motor went right on humming, run by the juice that was shooting through Cosimo's body.

The first thing he thought of was to try to fall. If he could drop to the floor he would break the connection. But falling was one thing he couldn't seem to do. His hand had tightened in a death-grip on those pliers, and doggone if he could open it. And the pliers had a firm grip on the cable—grip all the tighter because Cosimo was gripping them so hard.

## Couldn't Even Call for Help.

"I could feel every revolution of the motor as it passed through my body," he says. "Every time that motor turned over it hit me with a sort of jolt. I was all alone down there in the cellar, and I couldn't even yell for help. I tried to, but my voice wouldn't come. That current was paralyzing my vocal cords just as it had stiffened the rest of my body."

Every successive jolt from the motor felt worse than the last one—and Cosimo says that even the first ones were plenty tough. "My eyes felt as though they were popping out of my head," he says. "I had no strength left in my body. I was absolutely helpless. Then, all of a sudden I realized that the only thing about me that was working right was my mind, and I also knew that if I didn't do something about my predicament soon my goose was cooked. My mind would have to get me out of that jam, and do it right away while I still had strength enough left to fight."

So Cosimo began using that head of his, and the first thing he noticed was that his left hand was free. He was about all in then, and his heart felt as though it would burst any minute, but if he only had strength enough to lift that free left hand and bring it down hard on his right, he might break the connection and tear himself loose from the punishing current.

## How He Knocked Himself Into Safety.

"But it had to be done with a quick blow," he says. "For if I failed, my right hand would make a ground on the cable, form a complete circuit, and I would be absolutely helpless. I raised my hand, and if I wasn't holding my breath already I'd have held it then. It was my one chance for life. If it didn't work I was a goner."

Cosimo brought his hand down on that wrist and—it worked. His right hand, knocked clear of the wire, fell to his side, and then Cosimo fell too. His knees buckled under him and he slumped to the ground, breathing heavily, and pale as a ghost. He was still shaking like a leaf a few minutes later when he picked himself up and tottered up the stairs for a rest and a drink of water, and he was still weak and nervous six or eight days after it happened.

And Cosimo's last word of warning is to repeat what we've already heard him say before. "Don't let anybody tell you that a hundred and ten volts isn't dangerous. Keep your fingers out of those lamp sockets."

## Arrows From Yew Trees

Near Petworth, in Sussex, there survive yew trees from which arrows were made for the English bowmen in the French wars of the Fourteenth century. From this district 6,000 arrows went for that purpose in 1338.

## Rattles Used in 2000 B. C.

Rattles shaken by babies in 2000 B. C. are exhibited at the Field museum in Chicago. The rattles are made of pottery in shapes of animals. They contain pebbles for noise making.

## Many Miners Killed, Injured

If all the miners killed and injured in our collieries in one year were to march past us four abreast, says London Answers Magazine, the column would measure nearly thirty miles in length.

## Symptoms of Rabies

Rabies, or hydrophobia, means literally fear of water. A dryness in the throat and dread of even the sight or sound of water are symptoms of the disease.

## Dodo, Now Extinct, Was of Massive, Clumay Form

The dodo was a bird of the island of Mauritius, allied to the pigeons, but unable to fly. It was as large as a swan, of massive and clumsy form, with short, stout legs and feet, and a hooked bill much larger than its head. Its wings were rudimentary, and its tail composed of short curly feathers. Some early writers say that its body was covered with black down, with bare skin around the eyes and forehead; others, that the color of its breast was like that of a young pheasant and of its back, dun or deer-color. The dodo built a nest on the ground and laid but one egg about as large as that of a penguin. Its food was probably mangos and other tropical fruits.

Golden plovers make the longest continuous flight in the world—2,400 miles at a single stretch without alighting on the way, from Nova Scotia to northern South America, the entire trip taking forty-eight hours, flying steadily by night and day.

Important Underground Station Oberlin, Ohio, was the most important station on the Underground Railroad. Escaping slaves knew that to reach this town was to reach a haven of safety, for none was ever returned to bondage from there.

West Had Drought in 1492 Drought, fire and insects were plaguing parts of the West in the days of Christopher Columbus. A study of tree rings shows a long dry spell ended in 1492.

**VOTE FOR William Mason**  
419 Ninth St. - Wilmette, Illinois  
Democratic Candidate for Representative in Congress, 10th Congressional District, Primary, April 12, 1938; Election: Nov. 8, 1938.

Redemptorist Missionary

Special Sermon and Services Every Night  
at 8 o'clock

## Doughnuts For Dough Boys

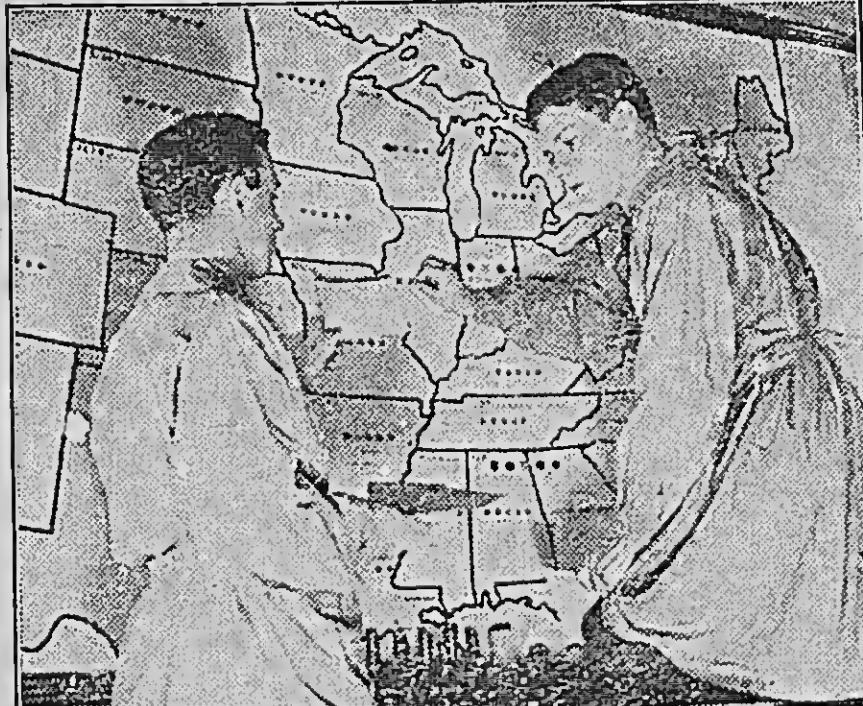

NEW YORK CITY—Twenty-thousand doughnuts were tossed to throngs jamming the side-lines as the Salvation Army Doughnut Hut float passed in the big American Legion parade.

Brig. Helen Purvance, the original "doughnut girl," is shown wearing the tin helmet she used when serving the boys in France. The float, a reproduction of the original Salvation Army Hut, is made of corrugated steel, tar paper and sand bags, and camouflaged with autumn branches.

Com. Jim Demarest of Ad-Men's Post 209 New York, is shown on the float assisting Brig. Purvance.

## Automobile Color Preference a Matter of Geography

Another indication of how thoroughly every phase of the automobile business must be analyzed is shown in the posting of "color preference" on this large scale map of the United States. The entire country is divided into seven zones or groups of states. Every week reports of customer preference for various colors of cars are posted, so that trends may be seen at a glance. Strangely enough, these trends do not vary greatly by season, but they do vary by geographical location. Black is by far the preferred color in the eastern and southeastern sections of the country, but the far west prefers the lighter grays, browns, greens and blues. In the photograph two men of the General Motors Art and Color Section are posting color preference reports from 47 Chevrolet sales zones throughout the country.

## American Wooden Indian Followed British Model

Two hundred years before he became American the wooden Indian was British, and even as far back as 1817 occupied the counters of the apothecary's shop. Not until the reign of Queen Anne, according to a writer in the New York Times, were shops opened purely for retailing tobacco products. Owing, probably, to the fact that the average artist of that day did not acquaint himself with the aborigines of other lands through first-hand experience, the characteristics of the wooden Indian smacked of African lineage. His embellishments often included the Roman shield, spear and tunic, though sometimes the skirt was of tobacco leaves and his headdress was composed of ostrich plumes. In fact, effigies of that particular design were usually called black-boys, the possible connection being between slaves who worked in tobacco fields and Indians who smoked the leaves of the plant.

The carvers of these figures were not limited to amateur artists. Some of the foremost sculptors of the day turned out many a well-modeled brave. Unfortunately, sculptors did not hallmark their pieces, so that little or no positive identification is possible.

Pine was the favorite wood from which the body was made—usually of one piece, exclusive of the arms. It was first blocked out with an axe into the space allotted for head, body, legs and feet. Carver's chisels roughly indicated detail later to be picked out with more delicate tools. The hands and arms were attached with screws. Occasionally an entire figure was constructed wholly of small blocks of wood glued together.

## Fifteen to a Bed

Fifteen guests could climb up to sleep in a community guest bed in one of the old Norwegian houses preserved in the famous open-air museum at Lillehammer, says Sydney A. Clark. If there were one or two more than fifteen, he writes, the host and hostess would take the extras into their own bed.

## Origin of Word "Bunk"

The member for the Buncombe district in the congressional discussion of the Missouri Compromise (1820) persisted in long speeches despite the boredom and impatience of his fellow members. The incident is reputed to be the origin of the name as well as the words bunkum and bunk.

## FARM TOPICS

## CORN IN SILO IS A GOOD WINTER FEED

## Crop Makes More Succulent Roughage Per Acre.

By F. R. Farbman, Dairy Specialist, North Carolina State College, WNCU Service. Comparatively few farmers take full advantage of their corn crop in producing feed for winter consumption. Corn made into silage produces more succulent roughage per acre than any other known crop.

The trench silo is the very thing for small farms where large upright silos would be impractical. Trench silos, inexpensive and convenient, are also being used more and more on farms where large herds are kept.

There is a growing tendency toward silage in preference to dry hay. Unfavorable weather at harvesting time is less serious for silage than when hay is being cut and cured.

Silage is succulent and keeps cattle in good condition through the winter. Silage production requires less acreage and, therefore, permits the use of soil-building crops on land that would otherwise be needed for growing hay.

The construction of a trench silo is fairly simple. A narrow trench should be dug on farms where only a few animals are to be fed. A cheap roof placed over the silo will help protect the feed from bad weather and keeps the walls from caving in.

## Liberal Fall Feeding of Cows Increases Profits

Liberal feeding of early fall freshening cows and of all cows during the dry period will materially increase the dairyman's income, according to E. A. Hanson, extension dairyman, University Farm, St. Paul.

Too often the early fall freshening cow is underfed because pastures are low, and to many dairymen it seems too early to start barn feeding only a few cows. All CTA records, however, show that fall freshened cows, well fed from the beginning, lead in year-round butterfat production.

During late summer and early fall months, alfalfa hay will serve as a pasture supplement if pastures are sufficiently heavy. If pastures are poor, fresh cows should receive a full feed of hay and grain twice daily in order to maintain high production. Silage may be fed to advantage immediately after the silo has been filled.

At this season of the year, fall freshening cows are being turned dry, and others are rapidly going that way because of poor pastures. Good dairymen aim to give their cows a dry period of about 6 weeks. Cows in flesh when turned dry should be fed a fattening ration during the dry period. Cows in good condition at freshening time will always start the lactation period giving more milk daily and continue at a higher level for a longer period than cows that have a short dry period and freshen in poor condition.

## Orphan Chicks Best

Raise your day-old chicks away from home, if you want them to grow up to be healthy layers, is the advice of Ohio research poultrymen.

Isolation of young chicks from older birds, but allowing them use of range on the experiment station farm, resulted in a mortality rate of 56 per cent. In an adjoining pen, other pullets, hatched from station eggs but which had been grown to laying age away from the station, had a mortality rate of only 24 per cent. This experiment caused the Ohio scientists to point out "the need for a new phase of specialization in poultry raising, the production of live ready-to-lay pullets.

The brooding of chicks and the growth of pullets in the future may largely become a commercial enterprise in the hands of specialists. —Country Home Magazine.

## HINTS FOR FARMERS

There are, as a rule, ten eggs to a pound.

A total of 5,035,000 motor vehicles of various descriptions are used on the farms of the United States.

A good orchard fertilizer contains readily available nitrogen. Nitrate of soda, sulphate of ammonia, and cyanamid are common forms that meet this requirement.

Canada was the leading exporter of honey to the British Isles in 1936.

A cellar with a dirt floor is better for potato storage than one with a cement floor.

The 1937 lamb crop is estimated by the bureau of agricultural economics at nearly 31,000,000 head.

Eggs whip to a larger volume and beat more rapidly if they are at room temperature than when they are chilled.

## Storms of Winter Injure Farm Land

## Protection From Erosion Is Urged by Early Use of Common Grains.

By R. H. Morris, Agronomist, Soil Conservation Service, Ohio State University, WNCU Service.

Land owners should make provisions to protect their fields from the destruction of winter storms which cannot aid crops but which do cause severe erosion.

Lack of water during the growing season prevented the usual amount of plant growth on most soils. Pastures have been overgrazed and the covering of grass will be thinner than usual. All these factors will combine to make conditions favorable for erosion during late fall and winter down-pours.

Oats, wheat, or rye will serve to protect fields which can be planted to these common grains. Oats will winterkill but if they are planted early enough they obtain sufficient growth to furnish ground cover in the winter. Wheat or rye are usually more satisfactory as cover crops and they can be plowed down in the spring in time to get the field ready for other crops.

D. R. Dodd, specialist in agriculture, Ohio State University, says thin pastures can be helped materially by applying lime and fertilizer and by reseeding the poorer spots. Lime should be applied only after the soil has been tested. Mr. Dodd recommends the use of 20 per cent superphosphate or a 0-14-6 fertilizer at the rate of from 300 to 500 pounds per acre.

Early fall seeding of the grasses in the pasture mixture frequently gives the best results. A good mixture contains 7 pounds Kentucky blue grass, 4 pounds timothy or orchard grass, 3 pounds red top, 3 pounds red clover, and 1 pound white clover. The legumes for this mixture can be seeded in the spring.

## Method Better Than Hand and Eye Aid to Sheepmen

Although wool is graded according to its fineness of fiber, the finest wool is not always the choicest, says Dr. J. I. Hardy, specialist in animal fibers, of the United States Bureau of Animal Industry. This knowledge, although not new to wool buyers, has been more definitely revealed in a recent study of wool-fiber measurements made by special apparatus developed by Dr. Hardy.

The measurements showed that the ability of an animal to produce a choice fleece is an individual rather than a breed characteristic. There is great variability among animals of the same breed. Cross-sectional photomicrographs and measurements of wool fibers have shown some surprising variations in fineness of wool from different flocks of the same breed and from different individuals of the same flock. In several cases, wool from medium-wool sheep proved to be finer than that usually obtained from some sheep of fine-wool breeds.

All measurements of samples were made with apparatus which Dr. Hardy has perfected, and has found to be much more accurate than the usual method of judging by hand and eye. The method offers breeders an opportunity to select their breeding stock with greater accuracy in respect to fineness and uniformity of wool.

## Corn and Cobmeal

Corn and cobmeal will not harm pigs. It will not produce quite as good gains due to the fact it is a little too high in fiber to be best suited to the digestion of fattening hogs. Corn and cobmeal is suitable for feeding to dairy cows or growing heifers or calves, states a writer in the *Rural New Yorker*. If so used, a good mixture is 600 pounds corn and cobmeal, 600 pounds ground oats, 400 pounds ground barley, 300 pounds wheat bran, 200 pounds linseed oilmeal. The mineral mixture of equal parts iodized stock salt, ground limestone and steamed boneemeal is suitable for all classes of live stock mixed with the feed to the extent of five per cent of the grain mixture.

## Bovine Tuberculosis

It is difficult to recognize tuberculosis in cattle in its early stages. The first noticeable symptom of a chronic case is a dry cough. The condition of the animal slowly deteriorates and there is loss of flesh, accompanied by an unhealthy appearance of the coat. The disease affects nearly all the organs of the body but in individual cases may be confined to one organ or a set of neighboring organs. —Indiana Farmer's Guide.

## Choosing Cider Apples

In making cider vinegar many fail to obtain a first class product due to unwise selection of fruit or use of unripe or decayed apples for the cider. Vinegar, according to requirements of many states regulating its sale, must contain at least four per cent acetic acid. Usually, high acidity of vinegar depends on the sugar content of the apple and resulting cider. For this reason mature apples are more satisfactory for cider vinegar.

**Illness Saved Treasures**  
So distraught was the eminent Bolshevik savant, Lunacharsky, over the reported demolition of Basil cathedral during the first days of the revolution in Russia that he became ill and took to his bed, writes Albert Rhys Williams in "The Soviets." Lenin went to see him and made him the head of a special commission for protecting and preserving the cultural inheritance of the past. As a result Russia's art treasures were saved.

**The Well-Balanced Diet**  
A well-balanced diet must consist of proteins, carbohydrates and fats, with adequate vitamins and minerals. A person engaged in mental work needs about 2,500 calories per day. The diet should contain animal protein, either eggs or meat; some cereals, as bread; fats, as butter and cream; with fruits and a variety of vegetables to furnish minerals and vitamins.

**Graveyard for Horses**  
Broomstick, Whisk Broom II, Peter Pan and many other great horses are buried in an attractive horse graveyard on the Whitney farm in Kentucky. Each grave is marked with a large tombstone.

**Short Words in Telephoning**  
Words of fewer than five letters are most commonly used in telephone conversation.

## Money to Loan

I have clients who have money to lend on first mortgages on real estate and others who want to borrow money on real estate. If interested either way, I will be glad to talk it over with you.

**The Vitamin Alphabet**  
Housewives who find it hard to learn the vitamin alphabet may be helped by the following simple government explanation: Vitamin A is said to prevent an eye defect; vitamin B, beriberi; vitamin C, scurvy; vitamin D, rickets; vitamin G, pellagra. The nutritionists say that the American dietary commonly lacks iron. Foods rich in iron are liver, meats, eggs, and green leafy vegetables. Recent government analyses revealed that next to liver, the oyster is the best natural source of iron and copper.

**Pointer Good Field-Trial Dog**  
Pointers as a breed possess the competitive spirit to a greater degree than is usually found in other bird dogs, a quality that makes them especially suited to public performance. It is rumored that during the Nineteenth century the English Pointer was repeatedly crossed with various Setters as they came into existence and favor. This, it seems, was partly to improve an old characteristic of the Pointer, an independence that made him object to correction and discipline, but which has made him the superlative field-trial dog.

## THEN HE TOLD HER WHY

"Why?" also whispered after his first embrace. Of course a man never really knows. But if the truth be told, "would be your lovely skin made you adorable." Cheeks of satin smoothness do this. 'Tis Nature's way. Express this lure in your complexion, given by the only almond base face powder—PRINCESS PAT. No powder of usual starch base can give such loveliness.

# WOMEN'S PAGE

**Did You Ever Try These Recipes? Do, Please**

## Devil's Food Cake

1 cup of sugar  
1 cup of sour milk  
1/2 cup of butter  
2 eggs  
1 teaspoon baking powder  
2 cups of flour  
6 tablespoons of chocolate  
6 tablespoons of hot water  
1 large teaspoon of soda  
Flavor with vanilla.  
Cream the butter and sugar together thoroughly. Add the egg yolks and mix. Mix the soda with chocolate and then add the water. Stir constantly. Add the sour milk and chocolate to the sugar, butter and egg yolks. Then add the baking powder gradually and beat until it is all smooth. Add the vanilla and then fold in the whites of the eggs. Bake in a layer or loaf.

## Quince Marmalade

3 1/3 pounds of quince  
4 oranges  
4 1/2 pounds of sugar  
2 cups of water.  
Wash, quarter and core quince carefully. Quarter and seed the oranges. Put the quince and the oranges through the food chopper. Place in a sauce pan and add the sugar and water. Let simmer stirring frequently, until the juice thickens. Pour into jars and seal with paraffin.

## To Cook Veal Steak

Dip the veal steak in flour and brown in butter. Add a can of Campbell's mushroom soup and let it simmer for half an hour.

This makes a very appetizing dish.

## Delicious Butter Rolls

2 cakes of compressed yeast  
1/2 cup of sugar  
1 1/2 cups of buttermilk  
1 teaspoon of salt  
1/2 cup of butter  
4 1/2 cups of unbleached flour  
1/2 teaspoon of soda.  
Crumble the yeast into a bowl. Add the sugar and then pour in the warm buttermilk over the sugar and yeast. Let this stand for ten minutes before adding the salt. Let the butter soften a little before adding it to mixture. Then sift the flour and measure. Resift it with the soda and mix in. Beat the batter until it is real smooth. Brush the top with butter and place the bowl over warm water. Let it stand for about thirty-five minutes; when it is very light, then turn out without stirring, onto a floured cloth. With a flour covered rolling pin, roll out as thin as possible. Brush the dough very lightly with flour. Next cut the dough in strips two inches wide. Then cut in squares and brush with butter. Pile up several squares and place the cut edges down in the buttered muffin pan. Repeat until all cups are filled. Brush tops with butter. Set in warm place. When light (about ten minutes) bake in a 400 degree oven for 20 minutes.

This makes about two dozen rolls.

## Household Hints

### The Care of Glass

Glassware can be strengthened by placing it in slightly salted water; let it come to a boil slowly, and then let it boil well. Cool the water very slowly, as the slower the process, the more effective the results.

### To Remove Marks From Furniture

White marks caused by water or heat can be removed from the furniture if washed well with warm water and soap. Wipe dry and rub with alcohol and then rub well with furniture polish.

### Household Hints

Cut the excess fat off around the edge of a steak when you're going to broil it so as to prevent it from catching on fire when you place it below the flame.

When separating eggs, if the yolk should get into the white, use the egg shell to remove it.

### Week's Hints

A little whole milk or evaporated milk added to the water in which corn on the cob (roastin' ears) is cooked will improve the flavor.

In pressing, never put an iron on the right side of any goods except cotton. Always lay a cloth between the iron and the goods.

Sour milk used in cakes instead of sweet milk called for in the recipe will keep the cake moist longer.

Sugar syrup instead of granulated sugar may be used for sweetening chilled beverages and punches.

To clean glass oven doors, rub with vinegar and then wash with soap and water.

When you are separating eggs, if you drop a portion of the egg yolk into the egg whites, moisten a cloth with cold water, touch it to the yolk and it will adhere to it.

A pinch of powdered sugar and another of corn starch beaten in with the yolks of the eggs will keep an omelet from collapsing.

Never soak mackerel or other salt fish with the skin down as the salt will remain on the skin.

If vegetables are over-cooked, the minerals and vitamins are destroyed.

When you are going to keep pie crust for a week, add one or two more tablespoons of water to it and it will not dry out.

Fruit and custard pies should be baked in enamel or pyrex pie pans.

Sprinkle flour over with sugar while chopping it and it will not adhere.

### To Try Out Fat

Cut the fat in small pieces and melt in the top of a double boiler. By doing it this way it requires less watching than if it were placed in a pan directly over the fire.

### Curtain Styles

Styles in window curtains, like clothing and furniture, change with the times. The one word that best describes present-day curtain styles is —simplicity. Gone are the fancy loops and heavy fringes of a few years ago. In offering curtain tips to home-makers recently, Mary A. Covert, home management specialist of South Dakota State College, pointed out that figured wall paper calls for plain curtains, while plain walls call for figured curtains. Curtains with small designs are suitable for small rooms with small windows. Large rooms with large windows call for larger designs.

As a general rule, the character of the room should decide the type of curtains used. For instance, the large formal room requires curtains with the large formal patterns often seen in damasks. For the same reason, the large, rough-plastered room with fireplace, beamed ceiling, casement windows and heavy furniture calls for curtains made of such rough-textured fabrics as crash, homespun or burlap—not fine satin draperies. For the housewife who has the time, it usually pays to buy good quality materials like voile, lawn, marquisette, chintz or cretonne and make curtains to suit individual rooms. Chintz or cretonne curtains create a friendly rather than a formal atmosphere in any room.

WHEN I was small the word "shortcake" suggested only one thing to me: it just naturally referred to the length of time the cake would be around once it was taken from the oven. Childish logic, to be sure, but how often I've seen the reasoning justified when my children find out I've fixed them.

### Raspberry Shortcake

3 cups sifted cake flour; 3 teaspoons double-acting baking powder; 1/2 teaspoon salt; 1/2 cup butter or other shortening; 2/3 cup milk; 1/2 quart crushed, sweetened raspberries.  
Sift flour once, measure, add double-acting baking powder and salt, and sift again. Cut in shortening; add milk all at once and stir carefully until all flour is dampened. Then stir vigorously until mixture forms a soft dough and follows spoon around bowl. Turn out immediately on slightly floured board and knead 30 seconds. Roll 1/4 inch thick on sheet, 16 x 8 inches. Cut in half. Fit one half into well-greased 8 x 8 x 2-inch pan. Brush with melted butter. Fit second layer of dough into pan. Brush with melted butter. Bake in hot oven (450° F.) 15 to 20 minutes.

To serve, separate halves, spread bottom half with soft butter and part of raspberries. Adjust top and spread with butter and remaining raspberries. Garnish with whipped cream and whole berries. Serves 8 to 10.

### Gossip Mirrors

Housewives of Ribe, Denmark, need not go into the street to know everything that is going on, writes Agnes Rothery in "Denmark, Kingdom of Reason." They have only to glance into the "gossip mirror," an admirable device fastened in front of a window to reflect the street in both directions, bring far-off things near and magnify those close at hand.

### Plenty of Pest

Peat—really undeveloped coal—is formed by decaying vegetable matter and is found in almost all swamps; in Ireland, rice; in the United States, almost any plant. Although when dried, peat gives almost as much heat as soft coal and is practically smokeless, it is not used widely in this country as fuel. It takes too long to dry. But if America's coal is ever exhausted, there will be plenty of peat to take its place. Under the Atlantic coast lie about 10,000,000,000 tons.

Calico in England in 1631  
Calico was first brought to England by the East India company in 1631.

MARMALADE-FOR-BREAKFAST fans can have marmalade the year 'round without ever stirring—if they'll slice a little fresh fruit in season to go with their oranges and lemons. Right now "marmalads" who want to follow this scheme ought to be flavoring up their strawberry marmalade and laying it in a stock of

Raspberry Marmalade.

6 cups (2 lbs.) prepared fruit; 7 cups (3 lbs.) sugar; 1 bottle fruit pectin.

To prepare fruit, peel off yellow rind of 2 oranges and 2 lemons with sharp knife, leaving as much of white part on fruit as possible. Put yellow rind through food chopper; add 1 cup water and 1/2 teaspoon soda; bring to a boil, cover, and simmer 10 minutes. Cut off tight skin of peeled fruit and strip pulp out of each section. Add pulp and juice to cooked rind. Crush or grind about 1 quart fully ripe raspberries; combine with orange mixture.

Measure sugar and prepared fruit into large kettle, filling up last cup with water if necessary. Mix well and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil gently 5 minutes. Remove from fire and stir skin by turns for just 5 minutes to cool slightly to prevent floating fruit. Pour quickly. Parboil hot marmalade at once. Makes about 11 glasses (6 fluid ounces each).

### Old Armenian Service

When the visitor enters the Armenian cathedral of St. James, writes a Jerusalem correspondent, a blue silk curtain, worked in Constantinople some two centuries ago, hides the altar and apse. Presently it is drawn, revealing the patriarch sitting in a great gilt chair in front of the altar, and, in a semicircle, the varabeds (higher regular clergy) of the monastery of St. James. The patriarch, almost crushed by the weight of his jeweled vestments, holds in his hand a crozier studded with diamonds. After opening prayers he is relieved of episcopal robes and as an act of humility proceeds to anoint the feet of twelve of his varabeds, and dries them with white cotton wool, while young men and girls dressed in violet sit in a circle on the floor of the nave and sing anthems in the ancient traditional melodies of the Armenian church.

Cooling of Molten Metal

Some molten metals will cool to below freezing before hardening.

### Julius Caesar, Versatile

Julius Caesar, the Roman statesman and soldier, was remarkably versatile. He excelled in war, in politics, in statesmanship, in letters, in oratory and in social gifts.

Cattle Tamed 10,000 Years Ago

Domestication of cattle is said to

have begun 10,000 years ago. Cows

were worshiped in Babylonia in

2000 B. C.

Lettuce Used Through Ages  
Vitamins may belong to the Twentieth century, but lettuce has been used for food through the ages. Herodotus says lettuce was eaten as a salad in 550 B. C. In Pliny's time it was cultivated and even blanched so the Romans could have it throughout the seasons. Later history, in the form of privy-purse expenses of Henry VIII, records a reward given a certain gardener for bringing "lettuce" to the court.

### Founder of Osteopathy

Andrew Taylor Still, founder of osteopathy, was born near Jonesboro, Va. In 1828. He farmed in Missouri, studied medicine at Kansas City and saw service in the Civil war. In 1864, when three of his children died of spinal meningitis, he devised the treatment known as osteopathy and practiced as an itinerant physician for some years. He settled in Kirksville, Mo., in 1877, and developed a large practice. Five years later he opened the American School of Osteopathy there. He died in 1917.

### Battle of Kites

Japanese kites are flown by groups of boys in Japan in competitions, or "kite battles." All sorts of decorative kites are made, light but quite strong, with special lines treated with a ground glass and glue mixture which makes them very sharp. In a battle, the idea is to see who can maneuver his string against the string of another kite, cutting it so that it will fall to the ground. The boy who causes most kites to fall wins.

### Pair—Two

Do not use "a pair" when all you mean is two. A pair refers to two things used together, equal, or suited to each other. It is not a synonym of the word two. We talk of a pair of tongs, a pair of deuces, a pair of lovers. A cow and a postage stamp are two objects, but they are not a pair of anything. A pair of twins would indicate four children. —Tilt-Bits Magazine.

### Nehemiah Grew's Seed Idea

It was Nehemiah Grew, English naturalist, who first announced to the world that no flower seed could develop without the union of the pollen and ovule. But the theory was so novel that scientists of his time were reluctant to believe it, and it was not until 1735, more than 100 years later, that Linnaeus reaffirmed the theory.

### Julius Caesar, Versatile

Julius Caesar, the Roman statesman and soldier, was remarkably versatile. He excelled in war, in politics, in statesmanship, in letters, in oratory and in social gifts.

### Cattle Tamed 10,000 Years Ago

Domestication of cattle is said to

have begun 10,000 years ago. Cows

were worshiped in Babylonia in

2000 B. C.

Commonwealth and State  
The two words, commonwealth and state, have about the same meaning, but "commonwealth" originally connoted more of self-government than "state." Strictly speaking, our Union consists of 44 states and 4 commonwealths. The four commonwealths are Massachusetts, Pennsylvania, Virginia and Kentucky.

### Ohio Once Had Many Snakes

Snakes once were so numerous in many sections of early Ohio that the settlers would organize snake hunts. Armed with clubs, axes and guns, the farmers would comb a section of the forest from morning to night, leaving hundreds of snakes dead in their wake.

### The Brain's First Switchboard

The main divisions of the brain are the cerebrum, considered the thinking part; the cerebellum, at the back base of the brain, and the medulla oblongata. Anatomists break down subdivisions of the brain into units of extreme complexity. The layman usually is interested in the principal kinds of substance out of which the brain is made: gray matter and white in both cerebrum and cerebellum. Gray matter is useless in running such important organs as the heart, lungs, diaphragm; the thinking part of the brain can not control digestion, manufacture blood-cells or operate the intestines.

Dr. Charles Macfie Campbell of the American Psychiatric Association, in *Literary Digest*, declares that various parts of the body really are separate brains and participate in the act of thinking, the brain being a vast switchboard.

### Saba, Strange Isle

Rugged, volcanic and with an area of less than five square miles, Saba might be called the strangest isle of the Caribbean. Her first families long ago regarded a son who left the island to seek work and a wife as disloyal to the homeland. Sabanites are suspicious of strangers from the outside world. Settled first by the English, who were later supplanted by the Dutch, Saba remains English-speaking. Its menfolk raise sheep, coffee and sugar. Its women make some of the finest lace and drawn-work in the area. The principal town, The Bottom, is paradoxically not at the bottom of the island but at the top.

### Etching Defined

Etching is the producing of original pictures by drawing on a copper plate covered with an acid-resisting ground; allowing the drawing, whose lines have bared the copper, to be eaten into the plate by immersion in an acid bath; rubbing a stiff ink into the sunken lines and then taking from this, by means of an etching press, a limited number of proofs.

### Orioles Called "Hangnests"

Orioles are called "hangnests" because they place their nests on limbs in such a manner that they hang down. As the nests swing in the wind, we may imagine that the baby birds are being rocked to sleep.

## A WORD

to the

Modern Parent...

### PROTECT YOUR CHILDREN'S EYES!

• What Jimmy and Sally will accomplish in school this year depends on their eyes.

If there are serious defects in their vision, by all means see an eye specialist.

But beyond this first precaution, the first duty of the modern parent is to provide proper lighting in those places in the home where children study, read, work or play.

Since educators tell us that 87 per cent of all sense impressions come through the eyes, proper lighting is especially needed at the desk or table where school work is to be done at home.

Check up on the lamps that your children will use. The correct lamp should be high enough that it gives good light over a wide area. It should be so shaded that the bright light will not shine directly into the eyes.

If the child sits in an armchair to read, there should be a lamp beside the chair.

An excellent lamp for reading or studying is the approved I.E.S. type which can light both upwards and downwards. Light thrown

down is softened by a diffusing bowl that also reflects light upward for general illumination. Such illumination eases eye muscles. Without it, the eyes must constantly adjust themselves to areas of brightness and darkness, causing strain and fatigue.

## TRAFFIC DEATHS....

(continued from page 1)  
1107 Bishop street, where he had come Saturday for a week-end visit. He is employed in Chicago.

Also injured in this accident was George Hubacek, of Berwyn, who was riding with Haycock.

Only minor injuries were sustained by Buddy Martens, the three-year-old son of Mr. and Mrs. E. H. Martens of Waukegan when he fell from his father's car while traveling on Washington street at 11 a. m. Sunday. The child was leaning against the door of the car when it suddenly opened.

## Seek Colored Driver

Waukegan police are seeking a colored truck driver, said to be named Ladd and supposedly living in that city for leaving the scene of an accident on Saturday. While attempting to make a left turn on May street the driver is said to have lost control of his truck and crashed into the residence of John Meyer. The driver abandoned the truck and fled.

On Skokie road in Highland Park, Mrs. Sophia Robinson, 45, suffered a broken collar bone and several broken ribs when a hit and run driver crashed into her car early Sunday morning.

A collision on Grand avenue near Gurnee Sunday placed Mrs. Nellie

Busch of Waukegan in St. Therese hospital with severe lacerations of the face and body. Mrs. Busch and her husband were driving east when their car was in a collision with one driven by George Clark, also a resident of Waukegan community.

Others injured Saturday were Ben Lichowski, 25, of Chicago, who was bruised about the head and body when his car ran off the highway near Volo and turned over in a ditch; and two motorists and a passenger who were injured at Dugdale road and 22nd street. Those hurt were Wm. Perdue, of Waukegan, who was driving south on Dugdale road, Knute Simonson of Highland Park, driver of the other car, and Albert Bronson, 9, who was riding in Simonson's car.

Negroes in Yugoslavia  
Negroes are known to have lived in various parts of Yugoslavia ever since the Turkish occupation of the Balkans. They were usually brought, both men and women, as slaves by Turkish officers and high dignitaries. Most of the male negroes were employed as eunuchs.

"Union Jack" Misused  
The union jack, as applied to the flag of Great Britain, is a misnomer. "Jack" is a diminutive on the sea, so that only a small flag is rightly termed a "jack."

Actual work on the park was finished some months ago, and since then the men have been working under the national parks service and have been engaged in construction projects in Illinois, using the county camp as a base.

After October 1st, only five CCC camps will be operating in Wisconsin state parks, C. L. Harrington, superintendent of forests and parks, has announced. Two camps were discontinued in July and two more go out of operation October 1 as a result of federal reduction in CCC quotas.

Recent federal regulations have changed the CCC from a strictly relief activity to a training and employment program.

## Religious Council Hold Annual Supper In Waukegan Tuesday

Twenty-five district and county officers of the Lake County Council of Religious Education were present at the yearly supper meeting of the Council, at the Waukegan Y. M. C. A., last Tuesday evening, October 5th. William C. Haltenehoff, of Lake Forest, presided, and reports were submitted by the county workers, showing a satisfactory financial condition, and progress and activity particularly in the training of teachers of children for work in the churches of the county, and in the work with young people.

Officers were nominated for the coming year, the nominations to be confirmed at the coming county convention, and a trustee elected to serve for three years. Plans were made for the activities of the year, recommendations to be submitted and passed upon by the larger group of delegates from the churches of the county, who will meet at the annual county convention to be held at the Gurnee Community Church, Tuesday, October 19th.

An interesting convention program has been prepared, on which speakers of well known ability in the religious educational field will appear. An unusual feature of this year's program will be the showing of a motion picture film, for the purpose of demonstrating the use of this medium in teaching. Programs are being mailed out this week to Sunday schools and churches, and to leaders of groups of young people.

## Electricity Was in Use Before Kite String Find

Electricity was discovered—only harnessed, to a limited degree—long before Poor Richard conducted his foohardy, but luckily successful, experiment with the kite string, asserts a writer in the Philadelphia Record.

From the days of Thales, 600 years before Christ, to Franklin's time, would-be scientists were busily rubbing amber, sulphur balls and pieces of glass to obtain mysterious electrical sparks.

But it wasn't until about 200 years ago that anyone did anything with the sparks except to admire them, and wonder at them.

Then came Stephen Gray, a poor pensioner in a famous London charity school, to send a current of "frictional" electricity over a 200-foot circuit of packthread suspended by silk loops.

He used the pupils at the school in his experiments, too—sometimes to their dismay. One of his favorite stunts was to suspend a boy in the air with a hair harness which fitted under his armpits, and then connect him to the electrical circuit.

The boy's body was electrified with the tiny charge and then he was made to blow soap bubbles. The other youths were astonished to see sparks fly from the nose of the suspended boy to the soap bubbles.

Sunbathing for Animals  
Sunbathing in moderation is good for most sick animals, provided they are not too seriously ill. It has the some stimulating effect upon them as upon the majority of humans, and zo doctors have had ample evidence of the tonic effects gained by exposing their patients to the early morning sunlight. It hastens recovery in a remarkable way.

## FOX RIVER PARK CCC CAMP CLOSED

## J. B. Rotnour Players Return to Crystal Oct. 21

The many friends of the J. B. Rotnour Players will be glad to know that they will open their regular fall season at the Crystal theatre on Thursday night, October 21. Heretofore the company has played here on Friday night, but in compliance with general request the date this season will be Thursday night.

Mr. Rotnour, who has completed a most successful season in Northern Wisconsin, says that it is through the friendly co-operation of the leading merchants and business men of Antioch that the Company is to return here with a complete cast of actors to be staged Oct. 21. "J. B." says, "Remember the date, and go prepared to laugh."

## Reveal Profiteering In Limestone Dust Made in State Prison

Profiteering in limestone dust manufactured by convicts at the Joliet and Menard penitentiaries was disclosed yesterday by A. L. Bowen, state director of public welfare. He also said he learned private individuals are obtaining crushed stone made at the prison which, under the state law, is to be used only for state highway construction.

Mr. Bowen took steps at Springfield to end these practices. He raised the price of the limestone dust from 70 cents to 90 cents a ton and ordered that it be sold only in carload lots. The dust is used to neutralize the acid in farm lands and usually is purchased by groups of farmers or farm bureaus.

Commercial truckers, however, had been getting loads of the dust at the prison gates at the old price of 70 cents a ton and selling it at a profit under the \$1.25 a ton price charged by private quarries.

Mr. Bowen also began an investigation to determine which township supervisors have been giving away or selling prison shipments of crushed stone.

## Mogul Diamond Is Among Gems in Moscow Exhibit

In an unpretentious room in the Moscow treasury, there is a simple glass case that contains the Great Mogul diamond, one of the largest in the world.

This priceless stone, formerly called the Orlov, in honor of the count who ran many risks to procure it for Catherine II's collection, has a long and colorful history. Originally weighing 300 carats, it adorned the throne of the Persian Nadir Shah until 1772, at which time it passed into the hands of the extravagant Russian empress.

Nadir Shah, to gratify a whim, decided to have it cut differently. The recutting was performed, but the Great Mogul lost 100 priceless carats. However, still flawless and of brilliant luster, it ranks among the leading diamonds of the world.

The treasury building's collection consists of several thousand precious stones. Afghanistan tribes bought secretly in China to grace the crown of the Empress Catherine, chrysolites gathered from the Red sea by Crusaders, rare emeralds and rubies, diamonds famous throughout Indian and Persian history, all having curious legends of their own, are set simply in black velvet casings in the treasury museum.

## Oxalic Acid in Plants

Oxalic acid is found in a wide variety of American plants, but seldom in quantities sufficient to cause illness. Leaves, not stems, of the garden rhubarb occasionally cause enough of it to cause trouble. The most important oxalic acid plant, economically, in the United States is the greasewood that grows abundantly in the arid regions of the West. Sheep often are injured by it.

## TRAFFIC SIGNALS...

(continued from page 1)  
hole is so constructed or loaded that a hand and arm signal would not be visible both to the front and rear of such vehicle then said signals must be given by such a lamp or device.

67. Method of Giving Hand and Arm Signals—All signals herein required given by hand and arm shall be given from the left side of the vehicle in the following manner and such signals shall indicate as follows:

1. Left turn—Hand and arm extended horizontally.

2. Right turn—Hand and arm extended upward or moved with a sweeping motion from the rear to the front.

3. Stop or decrease of speed—Hand and arm extended downward.

109. Signal Lamps and Signal Devices—(a) Any motor vehicle may be equipped with a signal lamp or signal device which is so constructed and located on the vehicle as to give a signal of intention to stop which shall be red or yellow in color and signals of intention to turn to the right or left, all of which signals shall be plainly visible and understandable in normal sunlight and at night from a distance of 100 feet to the front and rear, but shall not project a glaring or dazzling light; except that a stop signal need be visible only from the rear.

(b) All mechanical signal devices shall be self-illuminated when in use at the times mentioned in section \*

\*103. When Lighted Lamps Are Required—When upon any highway in this State, during the period from sunset to sunrise, every motorcycle shall carry one lighted lamp and every motor vehicle two lighted lamps showing white lights, or lights of a yellow or amber tint, visible at least five hundred (500) feet in the direction toward which each motorcycle or motor vehicle is proceeding, and each motor vehicle, trailer, or semi-trailer shall also exhibit at least one lighted lamp which shall be so situated as to throw a red light visible for at least five hundred (500) feet in the reverse direction.

110. High Altitude Benefit

Eighty per cent of the population of Bolivia lives at an altitude of more than 10,000 feet, and the country is noted for the number of old people over 100 years.

111. River Boats Have Chimes

Some river boats have chimes which are tuned to chords. River residents identify the various boats by their chimes long before they come into sight.

112. Barnacles

Probably one of the world's greatest travelers is the ship barnacle, which gathers in thousands upon bottoms of ships and is thus transported to all parts of the globe.

113. Sound Bubbles Evolve Light

Bubbles in water give off light when they are caused by high-pitched sound. The light is faint, and is cold like a glowworm's luminescence.

114. COAL \$6.50 PER TON DELIVERED Low Ash Content

Carl Ekdahl Tel. Lake Villa 116-R

115. HOUSE MOVING Will move all kinds of buildings any distance. Call for Estimate.
